01225 811 455

For older people, and those with limited mobility or disabilities, our modular ramp system ensures easy wheelchair access to the home. It enables homeowners and tenants to maintain their freedom, independence and safety at home, living in the community.

Designed and manufactured by Ramps For Access here in the UK, this adaptable, all-in-one system comprises standard ramps, landings, handrails and steps that are readily configured to meet the needs of all kinds of different home settings. Additional custom components can also be made.

A high-quality, reusable product, it provides local authorities, housing associations and home improvement agencies throughout the country with a cost-effective wheelchair ramp solution

that helps budgets go further. A flexible, free-standing system, it also doesn't require planning permission.

Uniquely, this class-leading modular ramp system is backed by our comprehensive end-to-end support service that includes: free site surveys, design and installation, minor groundworks, removal, storage and recycling – all handled in-house by the DBS-checked Ramps For Access team.

Features

- ✓ All ramps are individually designed to make any location accessible
- ✓ As part of our service, site visits, design and quotations are FREE to all clients
- ✓ Ramps fitted by our own qualified engineers, when required
- ✓ Assembled on site and ready for use within hours
- ✓ New warm to touch handrail with integral midrail
- ✓ All our employees are DBS checked to guarantee peace of mind when dealing with vulnerable people
- ✓ Minimum maintenance
- ✓ Reusable - providing ongoing annual savings to local authorities
- ✓ More cost effective than concrete. More durable and safer than timber. No planning required.
- ✓ 25 year guarantee

“Thank you for your quick response on supplying the ramp, all just perfect”

Customer,
Maidenhead

“The ramp has made my life so much easier and I found your men to be first class. I thank you and wish you good luck for the future”

Customer, Exeter

Recyclability

Recyclability is an essential characteristic of the Ramps For Access product range. Having a positive impact on sustainability and the environment, it also has a very positive influence on affordability. We design all of our products to be durable and reusable.

The strength and versatility of our free-standing modular wheelchair ramp system means more expensive permanent concrete and brick and rot-susceptible timber solutions can be avoided. And when the ramp's no longer needed, it's easily dismantled, refurbished and reused elsewhere.

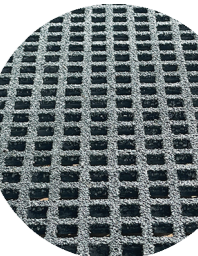

And uniquely for our sector, the fact that Ramps For

Access designs and manufactures all of its products here in the UK means it's also helping to minimise carbon emissions, by avoiding the adverse environmental impact of long-distance imports.

Recyclability is about caring more for the environment around us, and like you, we'll always play our part.

Maintenance

The ramps are constructed of GRP open mesh, with a high slip resistant surface, sitting on a mild steel galvanised frame. They require **virtually no maintenance** and carry a **25 year guarantee**.
